## Municipio de San Miguel de Salinas *Presidents Liaison Group*

### Press Release after a meeting with the Mayor of San Miguel de Salinas on 25<sup>th</sup> November 2009

The Mayor of San Miguel de Salinas, Angel Sáez called all the members of the Presidents Liaison Group to a meeting with himself and the Councillor for Urbanizations Sergio Correas. There were 15 Presidents or representatives of San Miguel Urbanizations in attendance.

The Mayor started by saying that there had been many problems in trying to find a solution to the water situation, including the Ayuntamiento fighting a court case for the past 12 months and dealing with the Valencian Government to resolve the funding of the project.

The Mayor stated that he had received permission to draw water from the “Mancomunidad de los Canals del Taibilla” pipeline and produced a letter from Central Government in Madrid confirming this. The Presidents were then shown a plan of the routing of the pipeline from the pumping station to join up with existing pipe lines at the top of El Galan. This he explained was Phase 1 to supply drinking water to the las Filipinas as soon as possible through existing pipes. This plan is scheduled to be completed by August 2010.

A second plan was then shown outlining the replacement of pipes throughout las Filipinas and the building of a 6000 cubic/meter deposito. This major works project is to be put to the next full council meeting and work will commence in tandem with Phase 1 as Phase 2 and is scheduled to be completed within 13 months of commencement.

The new water supplier will be responsible for replacing water pipes on the las Filipinas urbanizations and resurfacing where disturbed.

The Mayor thanked all the Presidents for coming to the meeting.

Terry Watson  
Chairman Presidents Liaison Group
